TOWN MANAGER'S OFFICE
TOWN OF DRACUT

Dear Mr. Duggan:

I am in writing in response to your letter to Ms. Tami Erwin and Mr. Robert Mudge of Verizon regarding FiOS deployment within the Town of Dracut. Thank you for your inquiry.

Verizon does not have plans to expand FiOS to new communities at this time and is focused on completing the build out of the FiOS network where we have contractual obligations through licenses. These local franchise agreements are provisioned upon offering FiOS to the entire community within a stated period of time.

We are pleased that communities such as Dracut have expressed strong support for FiOS. While we appreciate your interest in establishing more video and broadband competition within the town, Verizon does not have current plans to extend the FiOS network beyond its current footprint.

Once again, thank you for your interest.

Sincerely,

Stephanie Lee
