

## Storm Drain Stenciling Program

Maintenance and cleaning of catch basins not located on a public street are the responsibility of the property owner. No material should ever be dumped into a catch basin.

To help educate employees and discourage illegal dumping, property owners may wish to stencil their catch basins with a "Don't Dump" message.

The Town of Dracut will loan "Don't Dump" stencils to interested business owners.

For owners planning new or resurfacing of existing parking lots, permanent "Don't Dump" castings should be purchased. For future information, contact the Stormwater Department at 978-957-0411.

**When it Rains, It Drains.  
Protect Our Local Waterways.**

## Report Illegal Dumping

The dumping of any material into a catch basin is illegal in Dracut. If you observe someone dumping, immediately report it to the Stormwater Department at **978-957-0411**

## Stormwater Management for small businesses

## What Is Stormwater Pollution?

Stormwater is rain or snowmelt that flows over the ground. As stormwater runs over impervious surfaces, like driveways, roofs, sidewalks, and streets, it can pick up pollutants that have collected on these surfaces – such as motor oil, fertilizers, pesticides, and trash – and deposit them into catch basins.

Stormwater flows into the storm drain system and is discharged, without treatment, into nearby waterways, including Lake Mascuppic, Long Pond, Beaver Brook, Peppermint Brook, Bartlett Brook, Peters Pond, Trout Brook, Richardson Brook, and the Merrimack River.

Property owners are responsible for all pollutants in stormwater. Here are some things you and your employees can do to prevent stormwater pollution.

## Property Maintenance Tips

- Sweep outdoor areas daily for trash and litter control. Do *not* dispose of trash in catch basins.
- Provide trash receptacles in highly visible locations and outdoor receptacles for cigarette butts, particularly in employee break areas.
- Keep the area surrounding your dumpster clean and the lid closed. Make sure the clean-out plug is properly secured to prevent leaking.
- If you must hose down an area, don't use detergents or chemical cleaners to wash sidewalks or driveways.
- Dispose of all waste wash water in a janitorial sink or a floor drain that is properly connected to the sewer system. Never pour wash water onto a parking lot, alleyway, sidewalk, or street, as these areas ultimately drain to local waterways.

## How to Dispose of Hazardous Waste

**Never dump hazardous waste** – including chemicals, automotive fluids, paint, and commercial waste – **into catch basins**. Dispose of Hazardous waste properly.

If you are unsure as to how to dispose of certain material, consult the manufacturer of the product or call the Massachusetts Hazardous Waste Hotline for Businesses at 617-292-5898.

## Reminders for Restaurants and Food Establishments

- Properly maintain any grease traps in your establishment, in accordance with the Board of Health Department and Sewer Department regulations.
- Dispose of cooking oil and grease properly either in a receptacle designed to contain grease or by hiring a waste hauler.
- Wash garbage cans, floor mats, and kitchen equipment in designated wash areas that drain to the sewer system.

## Help Prevent Stormwater Pollution

- Don't dump into catch basins
- Keep property clear of trash and debris.
- Keep dumpster area clean.
- Provide trash receptacles for customers.
- Dispose of wash water properly.
- Stencil storm drains on your property.

**DON'T DUMP!**  
**PROTECT LOCAL WATERWAYS.**
